The World's Best Lenses

'ENTAL' ENLARGING LENSES

The specially designed range of 'Ental' lenses has met with an enthusiastic welcome from discerning and critical users, as enlargements made with these lenses retain all the detail, brilliance and gradations of the negative.

They are supplied in satin-chrome mountings, fitted with positive click-stop iris diaphragms which are scaled in exposure stop markings. The iris operating ring is extended prominently to facilitate dark room operation.

Lens	Aperture	Plate covered at full aperture.		Focus rom Flange Screw at infinity.	R.P.S. Flange Screw thread
		in.	mm.
